

# WORKSHOP ON STATISTICAL TECHNIQUES FOR AI AND DATA SCIENCE 2019

December 9-13, 2019

## About the Workshop

The fundamental pillars of any data analysis method lie in statistics. With the easy availability of in-built deep learning libraries, the statistical expertise is many times overlooked. We believe that with a deeper knowledge of statistical techniques, one can always make better and more efficient use of the AI and data science tools. In this workshop, we would provide an application-oriented introduction of statistical techniques through lectures and hands-on experience with Python to applying the concepts to data.

There will be an exam on December 13, 2019. Participants who clear the exam will be issued a passing certificate.

## About Indo-Taiwan Joint Research Center on AI and ML

The Indo-Taiwan Joint Research Centre on Artificial Intelligence and Machine Learning is an intergovernmental agreement for the promotion of the research between India and Taiwan. It is a bilateral collaboration in Science, Technology and innovation in the field of Artificial Intelligence and Machine Learning. The purpose of the centre to encourage International education in Artificial Intelligence, Academia-Industry Innovations and to provide exposure to young researchers.

## Convenors

**Dr. Arun Kumar**  
Assistant Professor  
(Mathematics)

**Dr. Mukesh Saini**  
Assistant Professor  
(Computer Science and Engineering)

## Target Audience

B.Tech. 3rd and 4th-year students  
Masters and PhD students  
Faculty  
Industry practitioners

## Registration

<http://forms.gle/qTHbSo5vgXiAHtnq8>

Please visit website for updates:
